I did a newspaper notice, but Brian said the State already published a notice, so I never sent it to you. Yes the fact sheet needs to be in Spanish. Thank you for all your corrections, I don't know what I would do without you. I never even thought about the acronyms when I switch the order, Thanks.

We continue to give Joy and Donn a hard time about using anyone but CH2 and I finally got through to Joy a week ago and she now agrees with me, so we will see where it goes. The in house people do not understand the things we do. They have no idea about asking about additional things like Spanish translation, did you do the notice, etc. etc.

You know our work is very fluctuating and at the moment I have a bunch of things all at once. N & S Cavalcade, Delta Shipyards(new proposal NPL), Wilcox, Van der Horst, AT & SF, Central Wood, Tulsa Fuels, etc. I love it when I'm busy and hate to be bored, so I'm not complaining, just busy and singing the Happy Song.

Thanks,
Bill

Hi, Bill ...first off, apologies. I thought track changes was turned on so you could see some minor changes I made, but it wasn't. As a result there are two documents attached. The one called AT SF FACT Sheet 2014 5 yr 5 13 14-revised.docx is the "new" file with changes made and the other one called ATSF Show Jameson Revisions.docx is a combination of your original file and the new one that shows the text changes I made. Again, sorry. Here's some of what I did:

- I changed the size of the font, added hyphenation, and combined lines of text in the for more information section to enable this to fit on two pages instead of four (this is one 8.5 by 11 sheet double-sides vs. one 11 by 17 sheet double-sided. This reduces printing costs.)
- I made the font on headlines consistent.
- I changed the link so that it goes directly to the site summary. The original link went to the

Region 6 superfund main page.

- You mentioned that the background section was repositioned from the front to the end. As a result, some of the first references for acronyms were at the very end. I changed those and added the full name of the site in the first paragraph.
- I double-checked your website and it does not appear that the 5-year view report has been posted yet.

Let me know what you think. We have a mailing list for this site. **Will you need to do newspaper notices? Will you need this translated into Spanish? In the past we've translated all AT&SF materials into Spanish. HILL can do that for you, if needed.**

Lorraine;

I did a fact sheet for AT & SF and Brian sent it to PRP and NMDEQ, they made some changes and this is what we have left. Please take a look at it and see if anything else needs to be changed. I don't know if it could be made shorter through formatting &/or editing, but it looks to me to be very informative and tells our story. I changed the order so the current activities are first and history last. I would only need a few extra copies and of course Zana needs hers. This should be good to go out unless someone sees something else that needs correction.

Thanks,

Bill

Bill

I have revised factsheet for the AT & SF site per comments from the PRP and NMED. It is ready to be sent out to the mailing list, so please let me know what if anything I need to do to get it mailed out.

Thanks
